ABSTRACTED-PUB-NO: JP2002360220A

BASIC-ABSTRACT:

NOVELTY - A health supplement food which improves haematogenous disorders comprises cat's claw (*Uncaria tomentosa*) and nattokinase, as active ingredients.

ACTIVITY - Anticoagulant; Cardiant; Thrombolytic

70 year old male suffering from cerebral infarction ingested daily a food containing cat's claw and nattokinase. After 10 months there was no thrombosis within the brain of the patient. The result thus confirmed that the food showed significant effect against thrombosis.

MECHANISM OF ACTION - None given.

USE - For preventing and treating haematogenous disorders such as thrombosis and infarction.

ADVANTAGE - The nattokinase and cat's claw exhibits a synergistic effects in inhibiting thrombosis. The food is highly safe for human consumption.
